

# Project Kick-off Meeting Materials

The Data Capacity for Patient-Centered Outcomes Research for People with Multiple Chronic Conditions was a two-day workshop with the purpose of convening experts from diverse domains to:

- Understand the data elements important to the care of people with MCC, including CKD, T2DM, CVD, chronic pain and/or OUD, across settings of care
- Identify, discuss and facilitate collaboration across ongoing work relevant to the development of e-care plans for people with MCC
- Discuss challenges and potential solutions relating to the electronic exchange of care plan data with regard to privacy, security, patient preferences, and interoperability, among other issues

The table below includes the meeting materials from that day. To see a full workshop event details and agenda click the link [here](#).

Date	Meeting Name	Description	Meeting Materials
02 Oct 2019	Data Capacity for Patient-Centered Outcomes Research for People with Multiple Chronic Conditions	<p>Background reading:</p> <p>The TEP Meeting White Paper is an environmental landscape review of AHRQ/NIDDK e-care plan related projects</p> <p>The Altarum Care Plan Report is a report on the variety and merits of care plan templates and regulations in use, including implications for information technology</p>	<p><a href="#">TEP Meeting White Paper Final.docx</a> (DOCX, 23KB)</p> <p><a href="#">Altarum Care Plan Report.pdf</a> (PDF, 1.2 MB)</p>
